Inspection Report

Referred to:	AAMA 2603-15, Voluntary Specification, Performance Requirements and Test Procedures for Pigmented Organic Coatings on Aluminium Extrusions and Panels
Coating name:	IGP DURA®face 5803
Client:	IGP Pulvertechnik AG Industrie Stelz, Ringstraße 30 9500 Wil Schweiz
Job number:	15315-1
Samples receipt:	29.08.2015
Start of testing:	06.09.2016
End of testing:	08.12.2016
Creation date:	03.03.2017
Number of pages:	7 pages

Reproduction, duplication, translation and use of assessment/report for advertising or transmission to third parties – whether as a whole, shortened or in an abridged version – requires written permission. The results documented in this report only refer to samples / records made available and belonging to them.

Accredited by DAkkS (Deutsche Akkreditierungsstelle GmbH) according to German Industrial Standard DIN EN ISO/IEC 17025 accredited test laboratory.

The accredited test methods are marked with an **asterix ***.

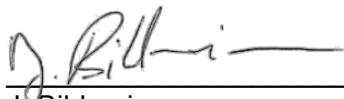

3 CONCLUSION

All samples fulfill the requirements according to the AAMA specification 2603-15 except the weather exposure part 8.8, which is still outstanding.

All tests were conducted in accordance with the AAMA specification 2603-15.

Schwäbisch Gmünd,
03.03.2017
