Facts

Area	Architecture
Location	Lyss, CH
Year of manufacture	2013
Architect	Swiss Property Planning, SPP

Details

Parts coated with DuraXal 4201E13343A3F were used in the construction of the Seelandcenter in Lyss. This special coating perfectly complements the color of the façade and helps to create an aesthetically pleasing overall look. The powder coating with the color 4201E13343A3F harmonizes seamlessly with the rest of the architecture and helps to create a uniform and appealing appearance. The parts coated with this yellow-beige IGP paint are characterized by a pearlescent effect and a deep matt finish. These properties give the components a special visual depth and texture that further enhance the architectural design of the Seelandcenter in Lyss and underline the aesthetics of the building.
